Subject: **LETTER OF RECOMENDATION for your product BIOL & COVID-19**

Dear Mr. Pulavsky:

Since we included BIOL (Certificate: CE EMKI 5-628-500-0911) in our product range and road-showed and demonstrated it on several occasions in Panama, various potential buyers showed interest.

We tested it with volunteers and the device proved the attributes of the device in relation to its properties as:

Analgesic - By reducing postoperative and rehabilitation periods in patients and calming pain as well;

Healing accelerator – shorter and more efficient the recovery process after the cerebro-vascular stroke or shortening the healing period of wounds and injuries,

Immuno-enhancer: by stimulating the patient's immune system, proving good results in fighting back viral diseases

Supporting means: in the treatment and prostate pathologies

Regarding its ability to fight viral infections I'd like to draw your attention in its potential use in SARS-CoV-2 infected patients.

In that respect I've been asked by the Panamanian Administration to quote COVID-19 related medical products and acting as an associated agent for a

Chinese state owned company I'm offering in my country:

- 1) Specialized medical products for COVID19.
- 2) Portable / Hospital Respirator (1)
- 3) Fixed / Hospital Respirator (2)
- 4) Fixed / Hospital Respirator (3)
- 5) Hospital motorized bed.
- 6) Specialized Mobile Hospital for COVID19.
- 7) Type P28 specialized ambulance
- 8) Emergency ambulances

And also other materials from South Korea such as diagnostic tests and masks type KN95 (CE Certified) and N95 (FDA Certified).

Obviously, I'd like to include BIOL in this product line-up as soon as feasible. Please, keep me posted about this possibility.

So, as a conclusion I would strongly recommend your Medical Device BIOL for use in medical institutions hospitals, clinics and also at home for personal use.

My congratulations for your successful designs.

Truly yours,

A handwritten signature in blue ink, consisting of a large, sweeping loop followed by a series of vertical and diagonal strokes.
